Art Unit: 2829

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- A) species in which method claim 1 is drawn to,
- B) species in which method claims 4-5 are drawn to,
- C) species in which method claim 6 is drawn to and
- D) species in which method claim 7 is drawn to.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Mr. Moore on 11/18/04 a provisional election was made without traverse to prosecute the invention of species in which method claim 6 is drawn to, claim . Affirmation of this election must be made by applicant in replying to this Office action. Claims 1,4-5 and 7 have been withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

3. The following is an examiner's statement of reasons for allowance: the prior art does not disclose a method for measuring mobile charge in a dielectric layer on a substrate having steps of applying first and second polarity corona bias temperature stress cycles to the layer on the substrate, measuring a corresponding voltage drop after the the second polarity corona bias temperature stress cycle, measuring a surface photovoltage before and after one of the successive second polarity corona bias temperature stress cycles and using the voltage drop and surface photovoltage measurements to determine the mobile charge.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. This application is in condition for allowance except for the presence of claims 1,4-5 and 7 to inventions non-elected without traverse. Accordingly, claims 1,4-5 and 7 have been cancelled.

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the specification, the insertion on page 1 filed by Applicants on 03/25/04, line 3, --2002-- has been changed to --2002, now Pat No. 6,771,092-- has been inserted.

Non-elected claims 1,4-5 and 7 have been canceled.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to VINH P NGUYEN whose telephone number is (571)-272-1964. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
